# Real Estate Insights (2011-2022)

Vinay Pratap Vishwakarma

# Project Summary

- This project presents a **Real Estate Insights Dashboard** built in **Tableau** to analyse property sales trends from **2011–2022**. The dashboard highlights key insights such as **sales growth over time, top-performing towns, property type distribution, and geographic sales patterns**.
- The analysis shows that **Single Family homes dominate the market**, while **Hot Springs leads in total sales among towns**. Most transactions occur in the **mid-price range**, indicating strong demand in that segment. Interactive features like **filters and actions** allow users to explore the data by **Year, Town, and Property Type**.
- Overall, the dashboard helps **identify market trends, high-performing locations, and investment opportunities** in the real estate sector.

# Agenda

- Key Insights – Total Sale Amount by TownMarket analysis
- Key Insights – Year-over-Year Sales Trend
- Key Insights – Distribution of Property Types
- Key Insights – Total Sale Amount by Town
- Key Insights – Sale Amount Distribution
- Key Insights – Sales Distribution by State

# Key Insights – Total Sale Amount by Town

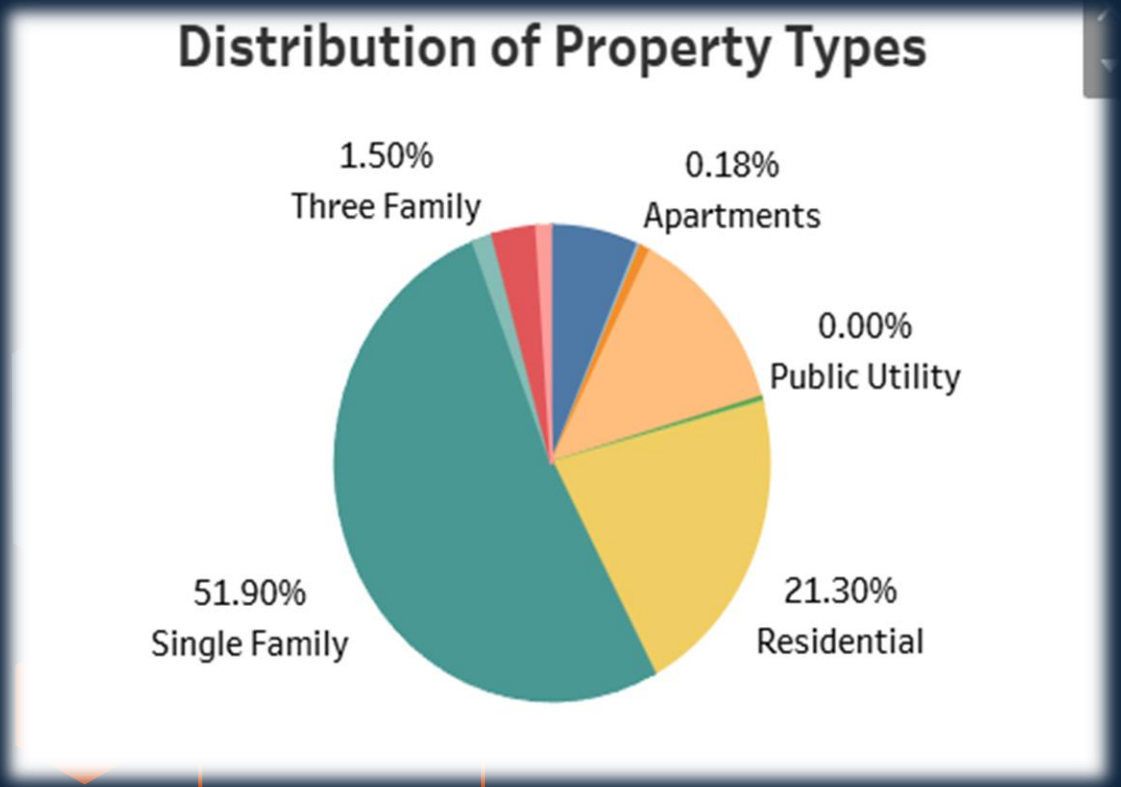
- **Hot Springs leads the market** with the highest total sales (~**$9.63B**), significantly outperforming other towns.
- **Asheville, Lubbock, and Morgantown** form the second tier, each generating **over $5B** in total sales.
- Most towns show **stable and similar sales levels**, typically ranging between **$4.2B – $4.8B**.
- The market appears **moderately concentrated**, where a few top towns contribute a larger share of overall real estate sales.

# Key Insights – Year-over-Year Sales Trend

- **Sales show a strong long-term growth trend**, rising from **$12.17B in 2011** to over **$30B by 2021**.
- **2020 recorded the peak sales (~$40.29B)**, indicating a significant surge in real estate activity during that year.
- **Short-term fluctuations occurred**, such as dips in **2015 and 2017**, but the overall trajectory remained upward.
- After the peak in 2020, **sales slightly declined to $30.58B in 2021**, suggesting a market correction following rapid growth.

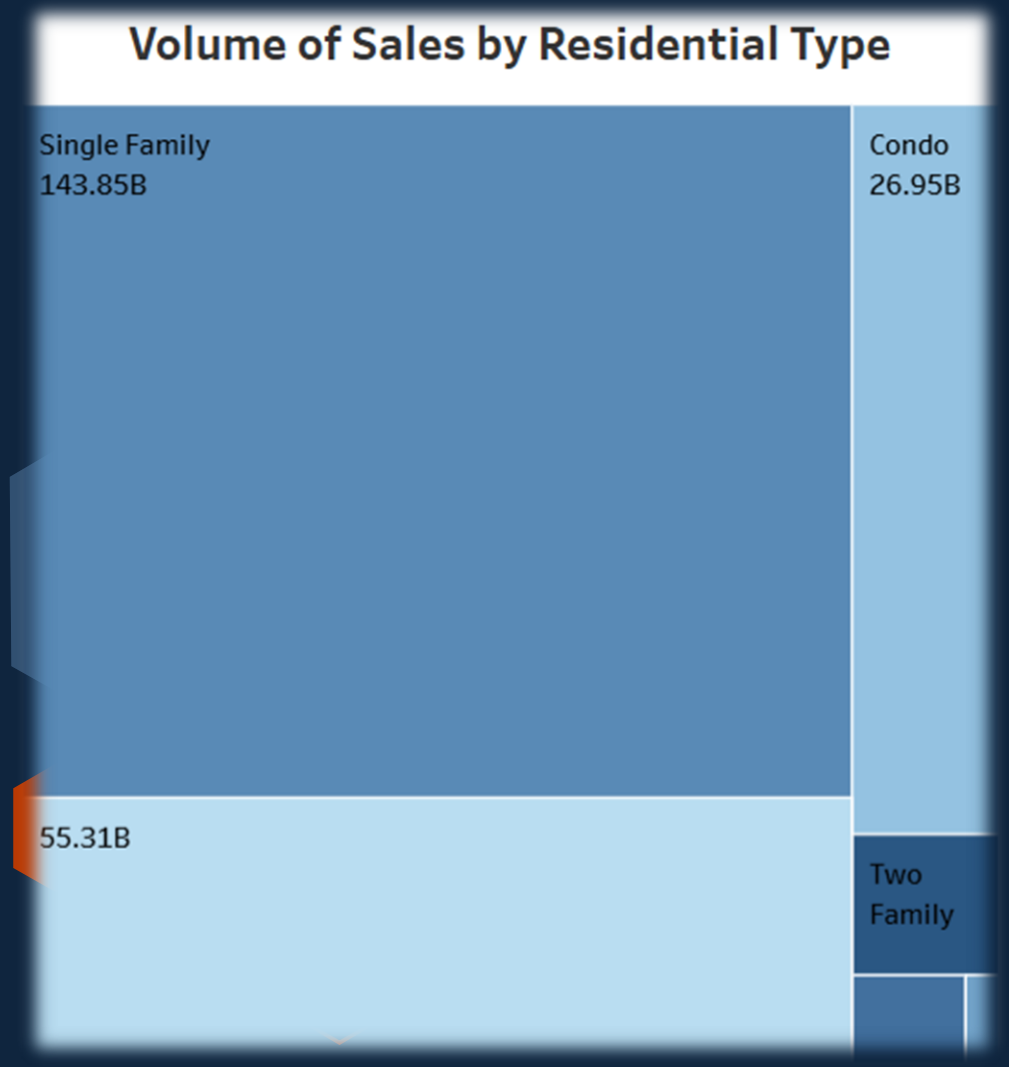
# Key Insights – Distribution of Property Types

- **Single Family homes dominate the market**, accounting for **51.9%** of all property transactions.
- **Residential properties** form the second-largest share at **21.3%**, indicating strong demand for general housing.
- **Apartments and Three-Family properties contribute a very small portion**, together making up less than **2% of the market**.
- **Public Utility properties show almost no transaction share**, suggesting minimal activity in this category.



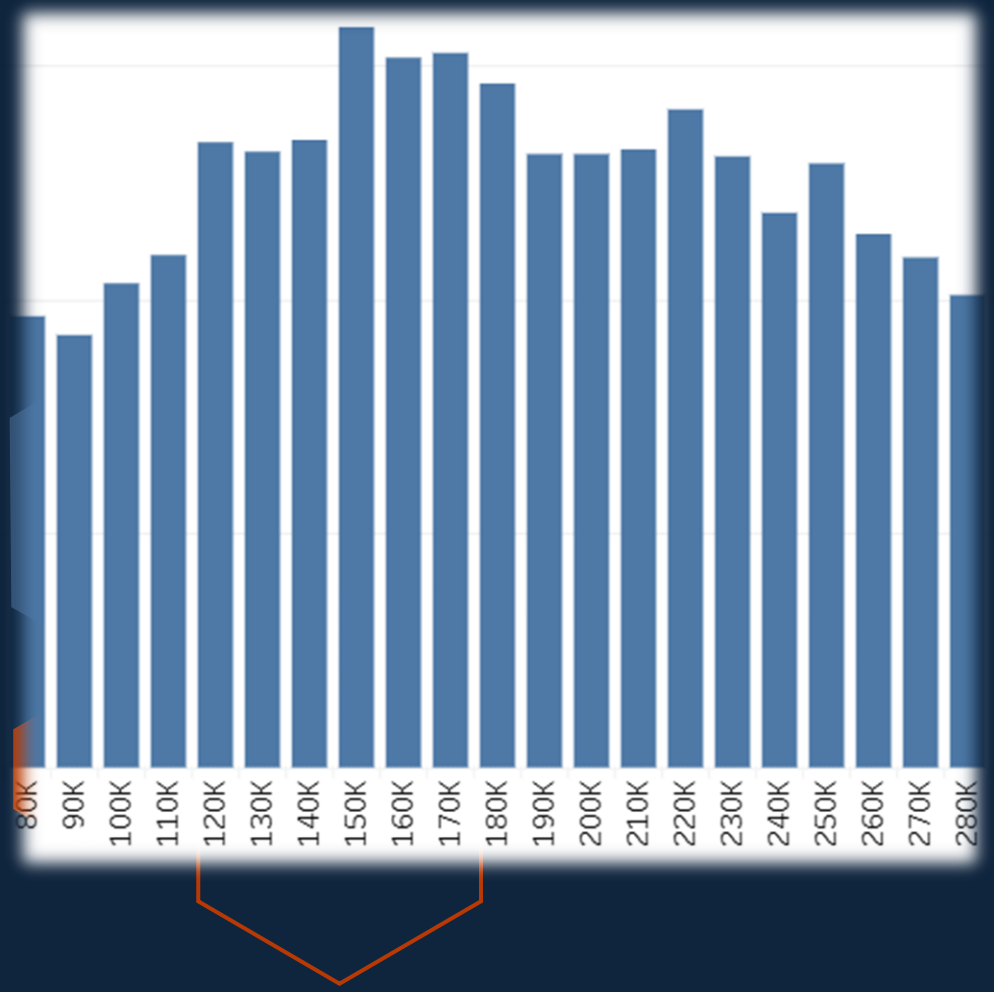
# Key Insights – Volume of Sales by Residential Type

- **Single Family homes dominate the market**, generating the highest sales volume at **$143.85B**, far exceeding other residential categories.
- **Residential properties contribute the second-largest share**, with approximately **$55.31B in total sales**.
- **Condominiums represent a moderate segment** of the market, accounting for about **$26.95B in sales volume**.
- **Two-Family, Three-Family, and Four-Family properties contribute only a small portion**, indicating significantly lower transaction volumes compared to single-family homes.



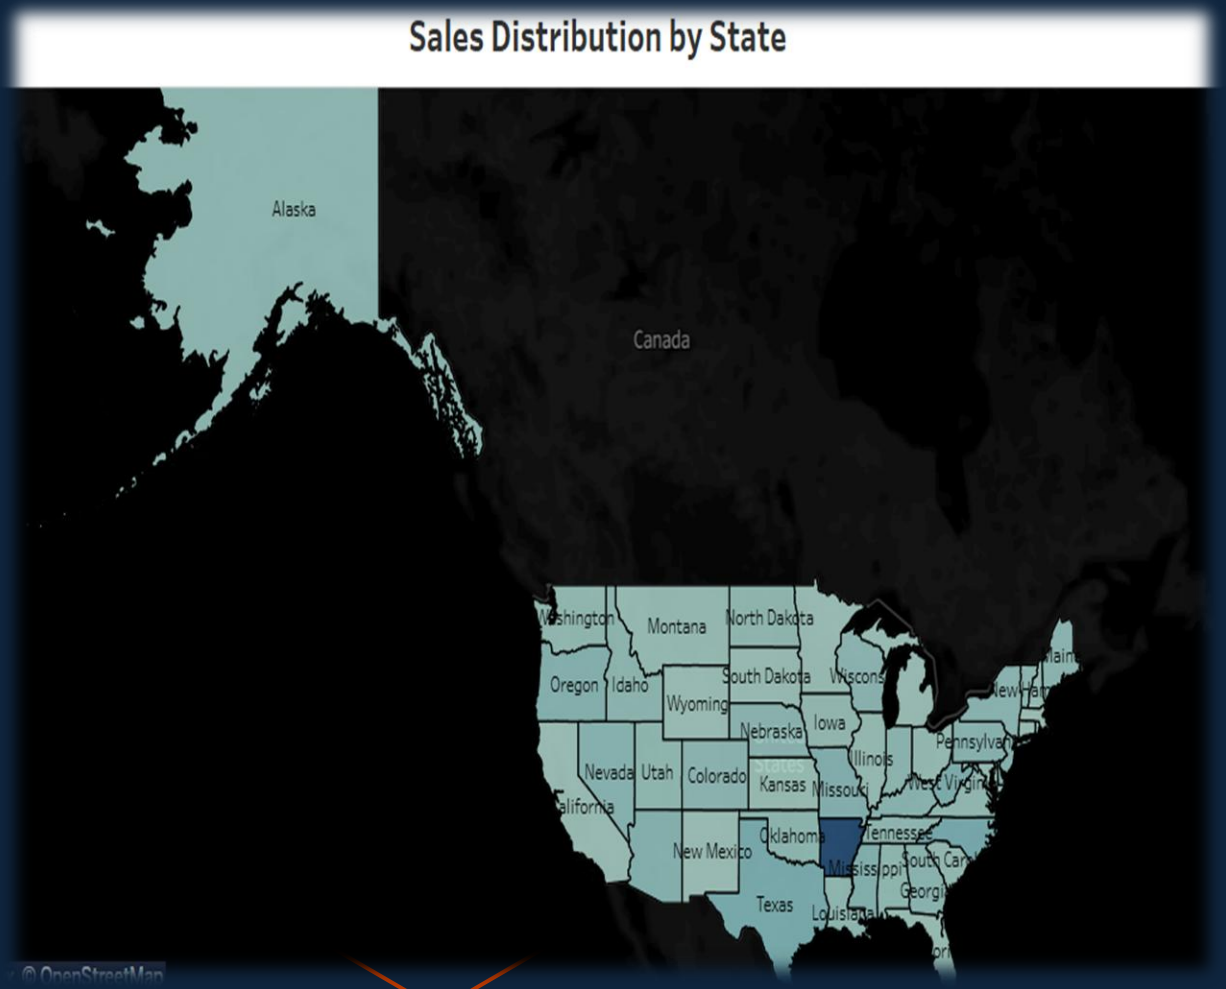
# Key Insights – Sale Amount Distribution

- **Most transactions fall within the mid-price range**, with the highest concentration between **$140K and $180K**.
- **Lower-priced properties (< $100K)** show fewer transactions, indicating limited activity in the lowest price segments
- As property prices increase **beyond $250K**, transaction frequency gradually declines.
- **High-value properties ($400K+) represent a smaller portion of total sales**, suggesting that premium real estate transactions are less frequent.



# Key Insights – Sales Distribution by State

- **Sales activity varies significantly across states**, with a few regions showing noticeably higher real estate transaction volumes.
- **Southern and central states appear to generate stronger sales activity**, indicating higher demand or active real estate markets in those regions.
- Several states show **moderate and evenly distributed sales levels**, suggesting balanced but less concentrated market activity.
- The geographic view highlights **location-based opportunities**, helping identify high-performing regions for investment and development.



# Recommendation

- **Focus investment and marketing efforts on high-performing towns** like **Hot Springs and Asheville**, as they generate significantly higher sales volumes and indicate strong market demand.
- **Prioritize Single Family properties**, since they dominate both **sales volume and market share**, making them the most profitable and stable real estate segment.
- **Target mid-range priced properties ($140K–$200K)**, as most transactions occur in this range, indicating the strongest buyer demand.
- **Leverage geographic insights** to expand development in states or towns showing consistent sales growth, while identifying underperforming regions for improvement opportunities.
- **Leverage geographic insights** to expand development in states or towns showing consistent sales growth, while identifying underperforming regions for improvement opportunities.

# Thank you
